

12-/24-Port Gigabit IEEE 802.3at PoE+ Managed Injector Hub

PLANET's newly-improved **(H)POE Managed PoE Injector Hub series**, a quick high-density rack-mountable managed PoE solution, is designed to perfectly upgrade an existing network infrastructure to IEEE 802.3at Power over Ethernet Plus network system without replacing the existing Ethernet Switch. The (H)POE Managed PoE Injector Hub series' management functions have been enhanced to include TLSv1.2 and TLSv1.3 protocols, PLANET DDNS/Easy DDNS service, PLANET NMS system, PLANET CloudViewer, and more.

Cybersecurity Network Solution to Minimize Security Risks

The cybersecurity feature included to protect the (H)POE Managed PoE Injector Hub series management in a mission-critical network virtually needs no effort and cost to install. Both TLSv1.2 and TLSv1.3 protocols are utilized to provide strong protection against advanced threats. The network administrator can now construct highly-secure corporate networks with considerably less time and effort than before.

Remote Management Solution

PLANET's **Universal Network Management System (UNI-NMS)** and CloudViewer app support IT staff by remotely managing all network devices and monitoring PDs' operational statuses. Thus, they're designed for both the enterprises and industries where deployments of PDs can be as remote as possible, without having to go to the actual location once a bug or faulty condition is found. With the UNI-NMS or CloudViewer app, all kinds of businesses can now be speedily and efficiently managed from one platform.

Interface

- **24-/48-port RJ45**
 - 12-/24-port 10/100/1000Mbps "Data input"
 - 12-/24-port 10/100/1000Mbps "Data + Power output"
- One 10/100/1000BASE-T management port

Power over Ethernet

- Complies with IEEE 802.3at Power over Ethernet Plus mid-span PSE
- Up to 12/24 IEEE 802.3at/802.3af devices powered
- PoE power up to 30.8 watts (802.3at PoE+)/15.4 watts (802.3af PoE) for each PoE port
- Automatically detects PD
- Circuit protection prevents power interference between ports
- Remote power feeding up to 100m

PoE Management

- Per port PoE power schedule
- PoE function enable/disable
- Per port PoE function enable/disable
- PoE port power feeding priority
- PD classification detection
- PD alive check

Security

- SPI firewall
- MAC filtering
- System CA certificate for HTTPS

Management

- IPv4 and IPv6 dual stack management
- Web interface for remote management
- PLANET DDNS and Easy DDNS
- Network Time Protocol (NTP)
- System Maintenance
 - Firmware upload via HTTPS
 - Configuration upload/download via HTTPS
 - Reboot button for system reboot

Perfect Managed PoE+ Injector Hub with Full Power Budget

The (H)POE Managed PoE Injector Hub series features PLANET **intelligent** functions where remote management can be done through **web user interface**. It provides 12/24 10/100/1000BASE-T Ethernet ports featuring **802.3at PoE+** injector function with a total PoE budget of 220 to 720 watts. Each PoE port can deliver up to 36-watt power over Cat.5/5e/6 Ethernet UTP cables which allow data and power to transmit simultaneously to a remote 802.3at/af powered device (PD).

The (H)POE Managed PoE Injector Hub series enables centralization of the power supply and optimizes the installation and power management of remote network devices, and provides a quick, safe and cost-effective Power over Ethernet network solution for small businesses and enterprises.

Model	PoE Standard	PoE+ Interface	Total PoE Budget
POE-1200G	IEEE 802.3at PoE+	12	220 watts
HPOE-1200G		12	360 watts
POE-2400G	IEEE 802.3af PoE	24	440 watts
HPOE-2400G		24	720 watts

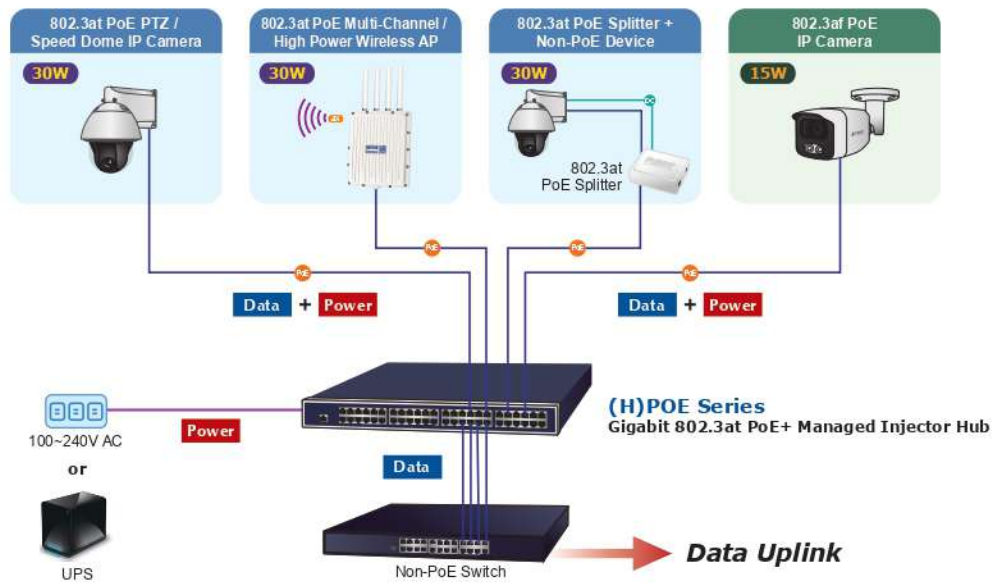

Quick and Easy PoE Network Deployment

The (H)POE Managed PoE Injector Hub series is installed between a regular Ethernet Switch and the PDs. There are totally 24/48 RJ45 STP ports on the front panel of the (H)POE Managed PoE Injector Hub series, of which the 12/24 ports on the lower part of the hub functioned as "Data input" while the other 12/24 ports on the upper part functioned as "PoE (Data and Power) output". Both power and data are transmitted simultaneously over the UTP cables to PDs without affecting the existing network performance and functions.

- Reset button for system reset to factory default
- PLANET Smart Discovery utility automatically finds PLANET devices on the network
- PLANET NMS system and CloudViewer for deployment management
- SNMP v1, v2c and v3 for system status monitoring
- SNMP trap for alarm notification of events
- System event log/remote syslog
- Scheduled System Power Rebooting
- Network Diagnostic
 - ICMPv6/ICMPv4 Remote Ping
 - Trace Route

Hardware

- 19-inch rack mountable; 1U height
- Reset button for resetting to default setting and system reboot
- LED indicators for PoE ready and PoE activity
- LED indicators for power alert and fan alert
- FCC Part 15 Class A, CE

With data and Power over Ethernet from one unit, the (H)POE Managed PoE Injector Hub series can reduce power cable deployment and eliminate the need for dedicated electrical outlets on the wall, ceiling or any unreachable place.

IEEE 802.3at PoE+ Standard Compliance

The PoE in-line power adopting the **IEEE 802.3at Power over Ethernet Plus** standard makes the (H)POE Managed PoE Injector Hub series able to deliver per port up to **36 watts** of power to each remote PoE compliant PD. It possesses double amount of power capability than the conventional 802.3af PoE and is an ideal solution to satisfy the growing demand for higher power consuming network PDs, such as PTZ (pan, tilt and zoom), speed dome network cameras, color touch-screen or video and voice over IP (VoIP) telephones, multi-channel 802.11ac wireless LAN access points and other network devices.

PTZ/Speed Dome Camera

User-friendly Web Management Interface

To efficiently manage the PDs, the (H)POE Managed PoE Injector Hub series provides simple **Web management interface** in which administrators can control the system and PoE functions for PDs. It can automatically detect the power status of each port and show messages on its Web management interface. These features also provide users with a cost-effective way to manage the device via Internet whenever they are at work or at home.

Built-in Unique PoE Functions for Powered Device Management

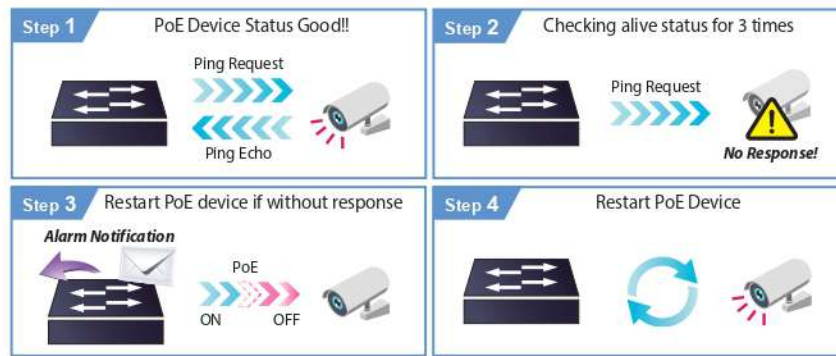

As it is the managed PoE Injector Hub for VoIP, wireless and surveillance networks, the (H)POE Managed PoE Injector Hub series features the following special PoE management functions:

- PoE schedule
- PD alive check
- Scheduled power recycling
- PoE usage monitoring

Intelligent Powered Device Alive Check

PLANET's Managed PoE products adopt not only Power over Ethernet technology, but also automated PD monitoring and real-time PoE status. The (H)POE Managed PoE Injector Hub series can be configured to monitor connected PD's status in real time via ping action through the uplinked Ethernet switch. Once the PD stops working and responding, the (H)POE Managed PoE Injector Hub series will recycle the PoE port power and bring the PD back to work. It also will greatly enhance the network reliability in that the PoE port will reset the PD power, thus reducing administrator's management burden.

PD Alive Check

PoE Schedule for Energy Savings

Under the trend of energy savings worldwide and contributing to environmental protection on the Earth, the (H)POE Managed PoE Injector Hub series can effectively control the power supply besides its capability of giving high watts power. The built-in "PoE schedule" function helps you to enable or disable PoE power feeding for each PoE port during specified time intervals and it is a powerful function to help SMBs or enterprises save power and money.

PoE Usage Monitoring

Via the power usage chart in the web management interface, the (H)POE Managed PoE Injector Hub series enables the administrator to monitor the status of the power usage of the connected PDs in real time. Thus, it greatly enhances the management efficiency of the facilities.

High Power Budget for PoE Extension

With 36-watt PoE output capability, the (H)POE Managed PoE Injector Hub series can extend much longer distance by using PLANET PoE Extender for powering up the PoE PD which can be installed over more than 100 meters away. By daisy-chaining multiple PLANET PoE Extenders, it offers the great flexibility of doubling, tripling or quadrupling the distance of PoE network.

Smart Fan Design for Silent Operation

The (H)POE Managed PoE Injector Hub series features a low noise design and an effective ventilation system. It supports the smart fan technology that automatically controls the speed of the built-in fan to reduce noise and maintain the temperature of the (H)POE Managed PoE Injector Hub series for optimal power output capability. The speed of the smart fan is displayed on the monitor. The (H)POE Managed PoE Injector Hub series is able to operate reliably, stably and quietly in any environment without affecting its performance.

Scheduled Power Rebooting

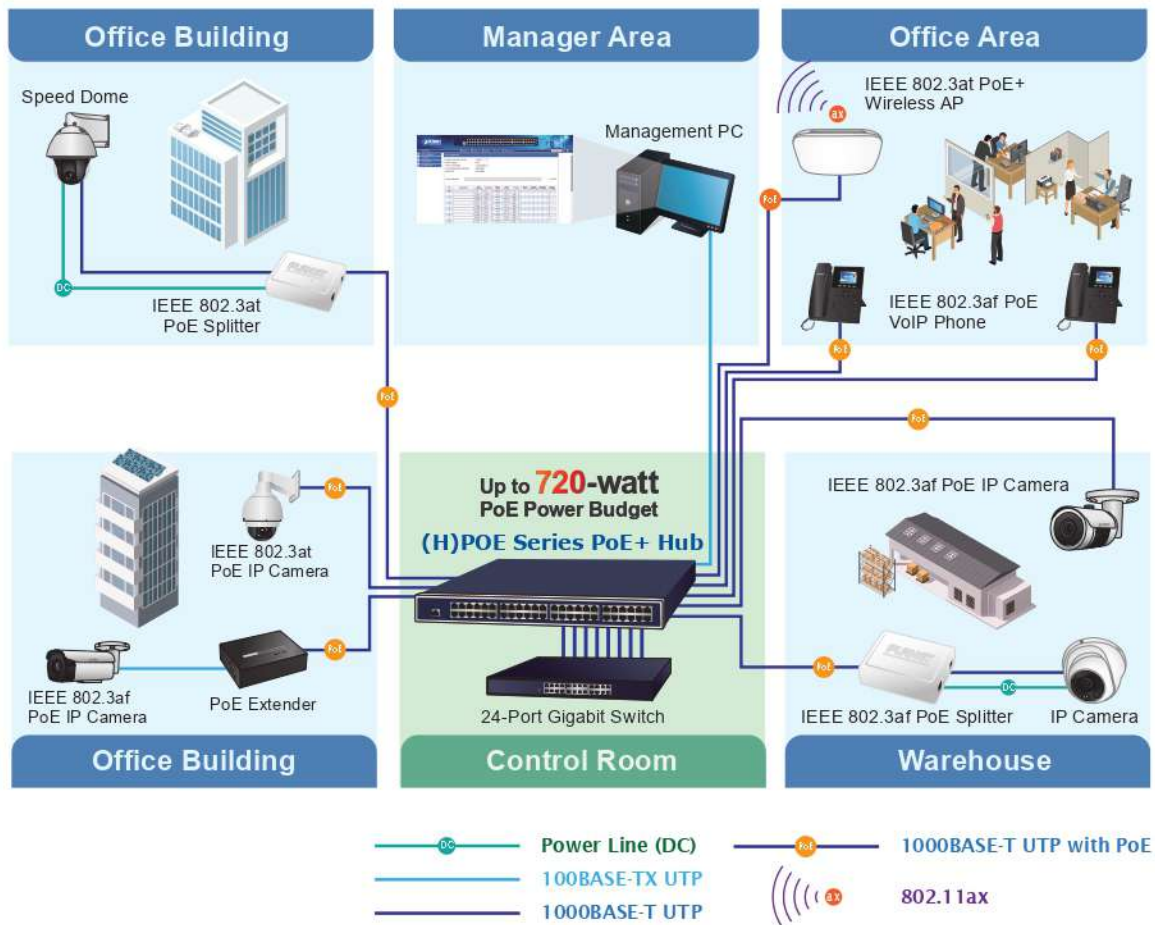

The (H)POE Managed PoE Injector Hub series can be scheduled to reboot at a specified time like every minute, every hour, every day to reduce the chance of PD device crash resulting from buffer overflow.

Applications

Gigabit PoE+ Network Deployment

The (H)POE Managed PoE Injector Hub series provides the easiest way to power your Ethernet devices such as IP camera on the ceiling and the wireless access point installed on the top of the building. With 12/24 10/100/1000 BASE-T Gigabit Ethernet ports, the (H)POE Managed PoE Injector Hub series supports full 54V DC power for any remote IEEE 802.3af/IEEE 802.3at powered device (PD).

To control the power system of your networking devices, the (H) POE Managed PoE Injector Hub series can directly co-work with network devices such as PoE IP phone to build VoIP telephony network in the office. Furthermore, the PoE hub can be directly connected to any third-party IEEE 802.3af/802.3at compliant devices installed within 100 meters.
