## 1. Package Contents

Thank you for purchasing PLANET Industrial Wall-mount Managed Gigabit Switch, WGS-5225-8UP2SV. The table below shows the model with the number of ports:

Model Name	Copper Port	Fiber Port	2.4 LCD
WGS-5225-8UP2SV	8 x 10/100/1000T	2 x 100/1000/2500X	■

In the following sections, unless specified, the term **“Wall-mount Managed Switch”** mentioned in this quick installation guide refers to the above model.

Open the box of the Wall-mount Managed Switch and carefully unpack it. The box should contain the following items:

The Wall-mount Managed Switch x 1	Quick Installation Guide x 1	2-pin Terminal Block Connector x 1
		
Wall-mounted Kit x 1 set	RJ45 Dust Cap x 8	SFP Dust Cap x 2
		

If any item is found missing or damaged, please contact your local reseller for replacement.

## 2. Requirements

- A flat-blade screwdriver
- **Workstations** running Windows XP/2003/Vista/7/8/2008/10, MAC OS X or later, Linux, UNIX, or other platforms are compatible with TCP/IP protocols.
- Workstations are installed with **Ethernet NIC** (Network Interface Card)
- **Ethernet Port Connection**
  - Network cables -- Use network (UTP) cables with RJ45 connectors.
  - The above Workstations is installed with **Web browser**.
  - The above Workstations have been installed with SSH and telnet client software, such as Tera Term or PuTTY.

Note

It is recommended to use Internet Explorer 8.0 or above to access the Wall-mount Managed Switch. If the Web interface of the Wall-mount Managed Switch is not accessible, please turn off the anti-virus software or firewall and then try it again.

### 3. Hardware Installation

#### 3.1 Wall Mount Installation

To install the Wall-mount Managed Switch on the wall, simply follow the following steps:

**Step 1:** Drill 4 holes with **8mm** diameter on the wall. The horizontal and vertical distances between the 2 holes are **230mm** and **124mm**, respectively.

**Step 2:** Hammer the four anchors into the four holes.

**Step 3:** Then the four given screws are screwed into the anchors to finish the wall-mount installation, as shown below.

### 3.2 Wall Hanging Installation

To hang the Wall-mount Managed Switch on the wall, simply follow the following steps:

- Step 1:** Drill 2 holes (one hole on each side) with 8mm diameter on the wall; the distance between the 2 holes is 230 mm and the line through them must be horizontal.
- Step 2:** Place two anchors inside the hole by hammering them. Then screw the two screws leaving a space of 2mm apart as shown in the circled diagram below.
- Step 3:** The switch, shown in the picture below, can now be hung on the wall.

Caution

Make sure the equipment is securely wall-mounted as strong vibration could cause it to drop or break.

### 3.3 Grounding the Device

User **MUST** complete grounding wired with the device; otherwise, a sudden lightning could cause fatal damage to the device. EMD (Lightning) DAMAGE IS NOT COVERED UNDER WARRANTY.

## 4. Wiring the Power Inputs

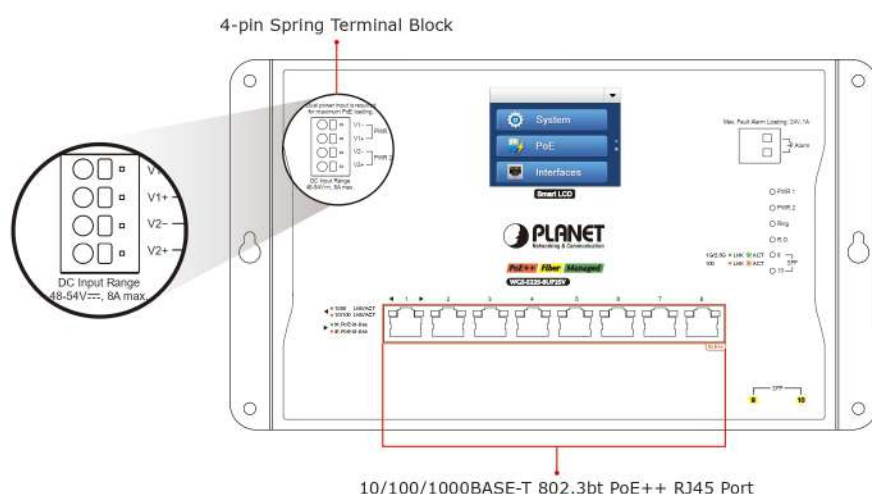

The Wall-mount Managed Switch features a strong dual power input system incorporated into customer's automation network to enhance system reliability and uptime.

Model \ Power Input Range	PWR1	PWR2
WGS-5225-8UP2SV	DC 48-54V, 8A max	DC 48-54V, 8A max

Note

Maximum power requirements also rely on the real site application.

Note

Dual power input is required for maximum PoE loading

■ **Single power** input: Max. **360 watts** PoE budget@52-54V DC

■ **Dual power** input: Max. **720 watts** PoE budget@52-54V DC

Caution

PWR1 and PWR2 must provide **exactly the same DC voltage** for power load balance while operating with dual power input.

## 4.1 Terminal Block Connector Pinout

The Front Panel of the Wall-mount Managed Switch consists of one **spring terminal block connector** within 4 contacts. Please follow the steps below to insert the power wire.

Insert positive/negative DC power wires into Contacts V1+ and V1- for Power 1, or Contacts V2+ and V2- for Power 2.

## 4.2 Wiring Completed in Three Steps

**Step 1:** Press the flat-blade screwdriver diagonally into the release hole.

**Step 2:** Leave the flat-blade screwdriver pressed into the release hole and insert the wire into the terminal hole.

Insert the wire until the stripped portion is no longer visible to prevent shorting.

**Step 3:** Remove the flat-blade screwdriver from the release hole.

After you connect the wires, pull gently on the wire to make sure that it will not come off and the wire is securely fastened to the terminal block.

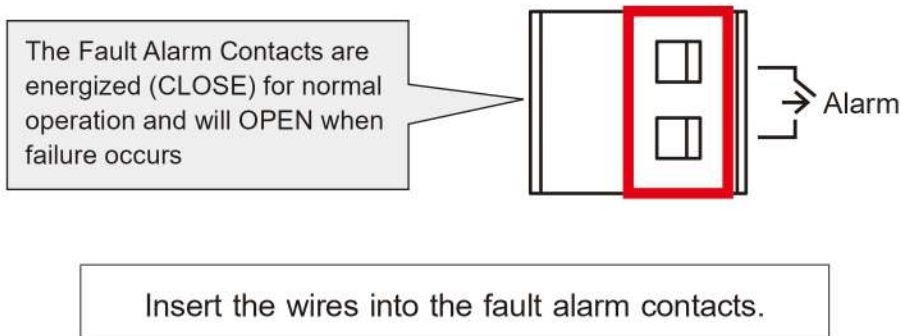

Insert the wire until the stripped portion is no longer visible to prevent shorting.

### 4.3 Wiring the Alarm Contact

The alarm contacts are in the middle of the terminal block connector as the picture shows below. Inserting the wires, the Wall-mount Managed Switch will detect the event status of the port or power failure and then forms an open circuit. The following illustration shows an application example for wiring the alarm contacts.

## 5. Web Login

### 5.1 Starting Web Management

The following shows how to start up the **Web Management** of the Wall-mount Managed Switch. Note the Wall-mount Managed Switch is configured through an Ethernet connection. Please make sure the manager PC must be set to the same **IP subnet address**.

For example, the default IP address of the Wall-mount Managed Switch is **192.168.0.100**, then the manager PC should be set to **192.168.0.x** (where x is a number between 1 and 254, except 100) and the default subnet mask is 255.255.255.0.

Figure 5-1: IP Management Diagram

### Logging in to the Wall-mount Managed Switch

1. Use Chrome 98.0.xxx or above Web browser and enter IP address **https://192.168.0.100** to access the Web interface.
2. When the following dialog box appears, please enter the default username and password (or the password you have changed before) as shown in Figure 5-2.

The screenshot shows a web browser's security warning dialog box. The title is 'Authentication required'. Below the title, it shows the URL 'https://192.168.0.100' and the message 'Your connection to this site is not private'. There are two input fields: 'Username' and 'Password'. At the bottom right, there are two buttons: 'Log in' (highlighted in blue) and 'Cancel'.

Figure 5-2: Web Login Screen

The following steps are based on the firmware version before **May of 2024**.

- 2.1 When the login dialog appears, please enter the default username and password.

Default IP Address: **192.168.0.100**

Default Username: **admin**

Default Password: **admin**

The following web screen is based on the firmware version of **May of 2024 or after**.

- 2.2 When the login dialog box appears, please enter the default user name "admin" and password.

Default IP Address: **192.168.0.100**

Default Username: **admin**

Default Password: **sw + the last 6 characters of the MAC ID in lowercase**

MAC ID: A8F7E0XXXXXX

Default Password: swxxxxxx

("x" means the last 6 digits of the MAC address.  
All characters should be in lowercase.)

Figure 5-3: MAC ID Label

2.3 After logging in, you will be prompted to change the initial password to a permanent one.

The image shows a web interface titled "Change Password". It features a form with two input fields: "Password" and "Retype Password". To the right of the "Password" field is a checkbox labeled "show password". Below the form are two buttons: "Apply" and "Reset". At the bottom, a note states: "The password must contain 8-31 characters, including upper case, lower case, numerals and other symbols. Please note, spaces (blanks) are not accepted."

New Password	
Password	<input type="text"/>
Retype Password	<input type="text"/>

☐ show password

The password must contain 8-31 characters, including upper case, lower case, numerals and other symbols. Please note, spaces (blanks) are not accepted.

**Figure 5-4:** Change Password Screen

Note

If you have already changed the password via web login, please use this new password to log in and skip steps 2.2 and 2.3.

3. Once the password change is completed, re-enter the web interface using your new password and the main screen appears as **Figure 5-5** shows.

**Figure 5-5:** Web Main Screen of Wall-mount Managed Switch

The Switch Menu on the top of the Web page lets you access all the commands and statistics the Wall-mount Managed Switch provides. The Switch Menu always contains one or more buttons, such as "**Refresh**", "**Save**", "**Help**" and "**Logout**".

Figure 5-6: Switch Menu

Note

If you are not familiar with Switch functions or the related parameter, press "**Help icon**" anytime on the Web page to get the help description.

Now, you can use the Web management interface to continue the Switch management. Please refer to the user's manual for more.

## 5.2 Saving Configuration via the Web

To save all applied changes and set the current configuration as a startup configuration, the startup-configuration file will be loaded automatically across a system reboot.

1. Click the **Save** icon on the top Switch Menu bar.

2. Press the "**Save Configuration**" button.

Save Running Configuration to startup-config

Save Configuration

3. Or the other way to save the setting is to Click **Maintenance, Save Startup Config**.

## 6. SSH Login

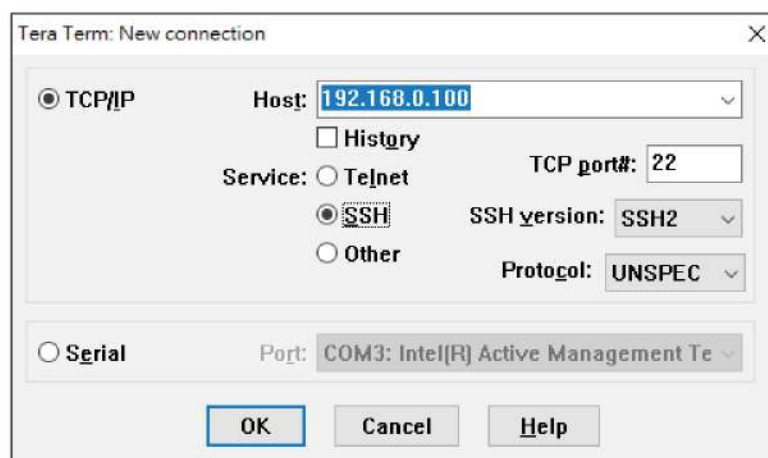

The Wall-mount Managed Switch also supports SSHv2 for remote management. The switch asks for user name and password for remote login when using SSHv2 client software; please use the default username and password. Refer to **5.1 Starting Web Management** to determine your initial login password.

Default IP address: **192.168.0.100**

Username: **admin**

Password: **admin** →(Based on the firmware version before May of 2024.)

Default Password: **sw + the last 6 characters of the MAC ID in lowercase**  
→(Based on the firmware version of May of 2024 or after.)

```
Username: admin
Password: ****
WGS-5225-8UP2SV#
```

**Figure 6-1:** Wall-mount Managed Switch SSHv2 Login Screen

The user can now enter commands to manage the Wall-mount Managed Switch. For a detailed description of the commands, please refer to the following chapters.

Note

1. For security reason, **please change and memorize the new password after this first setup.**
2. Only accept command in lowercase letter under console interface.

## 6.1 Configuring IP Address

The Wall-mount Managed Switch is shipped with default IP address shown below:

IP Address: **192.168.0.100**  
Subnet Mask: **255.255.255.0**

To check the current IP address or modify a new IP address for the Switch, please use the procedure as follows:

### ■ Display of the Current IP Address

1. At the “#” prompt, enter “**show ip interface brief**”.
2. The screen displays the current IP address shown in Figure 6-2.

```
WGS-5225-8UP2SV# show ip interface brief
Interface Address Method Status
-----
VLAN 1 192.168.0.100/24 Manual UP
WGS-5225-8UP2SV#
```

Figure 6-2: IP Information Screen

### ■ Configuration of the IP Address

3. At the “#” prompt, enter the following command and press **<Enter>** as shown in following

```
WGS-5225-8UP2SV# configure terminal
WGS-5225-8UP2SV (config)# interface vlan 1
WGS-5225-8UP2SV (config-if-vlan)# ip address 192.168.1.100 255.255.255.0
```

The previous command would apply the following settings for the Wall-mount Managed Switch.

IP Address: **192.168.1.100**  
Subnet Mask: **255.255.255.0**

4. Repeat step 1 to check if the IP address has changed.

## 6.2 Storing the Current Switch Configuration

At the “#” prompt, enter the following command and press **<Enter>**.

```
# copy running-config startup-config
```

```
WGS-5225-8UP2SV# copy running-config startup-config
Building configuration...
do not reset or power off the device!
% Saving 3637 bytes to flash:startup-config

WGS-5225-8UP2SV#
```

**Figure 6-3:** Saving Current Configuration Command Screen

If the IP is successfully configured, the Wall-mount Managed Switch will apply the new IP address setting immediately. You can access the Web interface of the Wall-mount Managed Switch through the new IP address.

Note

If you are not familiar with the command line interface (CLI) or the related parameter, enter “**help**” anytime in CLI to get the help description.

## 7. Recovering Back to Default Configuration

### ■ IP Address has been changed or admin password has been forgotten –

To reset the IP address to the default IP address “**192.168.0.100**” or reset the login password to default value, press the **reset button** on the front panel for about **5 seconds**. After the device is rebooted, you can log in the Web interface management within the same subnet of 192.168.0.xx.

**Figure 7-1:** WGS-5225-8UP2SV Reset Button

## 8. LCD Touch Screen

The WGS-5225-8UP2SV has a 2.4-inch color LCD touch screen with management functions. Tap the LCD touch screen to wake the LCD touch screen.

Figure 8-1: To wake the LCD touch screen

The factory default LCD configurations are shown as follows.

Default LCD: **Enable**

Default Touch Screen: **Enable**

Default Backlight Timeout: **Enable**

Default Backlight Timeout Time: **300**

Default Read Only Mode: **Disable**

Default Screen: **Main Menu**

Default Time Interval: **10**

Default Color Scheme: **Dark**

Default Pin Number: **1234**

You can use the Web management interface and click LCD, and then in the LCD Management, change LCD configuration.

LCD Management	
LCD	Enable ▼
Touch Screen	Enable ▼
Backlight Timeout	Enable ▼
Backlight Timeout Time	300
Read Only Mode	Disable ▼
Default Screen	Main Menu ▼
Time Interval	10
Color Scheme	<input checked="" type="radio"/> Dark <input type="radio"/> Light
Pin Number	1234

Please refer to the user’s manual for more.

## 9. Customer Support

Thank you for purchasing PLANET products. You can browse our online FAQ resource and User's Manual on PLANET Web site first to check if it could solve your issue. If you need more support information, please contact PLANET support team.
